

MERLIN 4000

THE MOST ADVANCED PRESS BRAKE GUARDING SYSTEM
JUST GOT BETTER!

Pioneered by ISB, the **MERLIN 4000** learns the proper safety height for each cycle and part profile. Unlike a laser, the unique **MERLIN** concept, protects your operator from uneven tool heights.

- No bypassing or adjusting per tool change
- Allows your press and process to run at max efficiency.

NO DECISIONS. NO ERRORS. NO COMPLICATIONS.

- ✓ Can be used on any type of press brake.
(mechanical, hydraulic, servo-brakes, up-acting or down-acting)
- ✓ No altering of rapid advance or slow speed of press brake.
- ✓ New compact touch screen based HMI panel for easier use.
- ✓ On screen diagnostics / troubleshooting.
- ✓ For more features of the MERLIN 4000 visit alta-tech.com
